

# Nebraska: Epicenter of the Global BioEconomy

**Safeguarding America's Food Supply  
and Securing Energy Independence**

The full-value BioEconomy will safeguard and enhance the US food system, revitalize rural America and deliver the products the world is demanding for energy resiliency and secure supply chains.

*And Nebraska is its epicenter.*

*bi●o●e●con●o●my*

The knowledge-based production and utilization of biological resources, biological processes and principles to sustainably provide goods and services across all economic sectors.

Bioeconomy involves three elements: renewable biomass, enabling and converging technologies, and integration across applications concerning primary production (i.e.

**FOOD, FARM +  
RESOURCE SECURITY =  
HOMELAND SECURITY**

An aerial photograph of a rural community. In the foreground, there's a residential area with houses and green lawns. To the right, a large grain elevator with several tall white silos stands next to a railroad track. A multi-lane road runs parallel to the railroad. The background shows a vast, flat landscape under a blue sky with scattered white clouds.

# **PRIORITIZE THE FORTIFICATION OF FAMILY FARMS AND RURAL COMMUNITIES**

**TRANSMIT ONE VERSION  
OF THE TRUTH TO  
ALL STAKEHOLDERS**

**FEED WHAT IS  
ALREADY GROWING**

# REDUCE FRICTION TO INNOVATION

# FINALLY TELL OUR STORY

**Julie Bushell**
